

# BAZER

## **A tradition of excellence in MANUFACTURING**

BAZER crushing, screening and conveying equipment is manufactured and assembled at the newly-built factory of BHP Infrastructure at Faridabad, an industrial town on the outskirts of New Delhi that houses renowned manufacturing names like Escorts, Yamaha, JCB, Claas, etc.

Built on a five acre site, BHP Infrastructure has a modern factory designed for heavy fabrication and assembly of wheeled and track plants. In-house design, engineering and testing facilities support modern manufacturing that delivers quality equipment. In addition, the facility houses a large component store stocking a complete range of spares and wear parts.

BHP Infrastructure's manufacturing excellence has been recognized by European OEM's for whom we also manufacture tracked screening plants and crushers.

The BAZER range is largely based on American technologies and incorporates the very best components sourced from the US and Europe. Our tradition is to provide our customers with the best value mix to deliver reliability at the lowest cost: **VALUE WITHOUT COMPROMISE**

Our customers are assured of comprehensive service and support from one of the largest service teams in the industry, experienced in installing equipment in all parts of India, in the Middle East, in Africa and in South East Asia.

## PROFIT FROM RELIABILITY

**BAZER reflects over twenty years of excellence in delivering crushing, screening and conveying equipment to mining, construction and cement industries. With over 1200 installations worldwide, we are dedicated to our customers and are committed to the performance and reliability of our equipment.**

### BAZER range of Crushing Equipment

Based on American technologies and designed for high reliability, the crushers have been deployed in demanding applications like iron ore crushing, quarry crushing, sand production and clinker pre-crushing. The range includes Single Toggle Jaw Crushers, Hydraulic Cone Crushers, Vertical Shaft Impactors and Horizontal Shaft Impactors. A wide variety of configurations are available that can customize the crusher to the customer's specific application.

### PRODUCT RANGE

Incorporates Circular Motion Screens, Linear Motion Screens and elliptical motion Triple Shaft Horizontal screens, and also a full range of Vibratory Feeders including Grizzly Feeders. These machines are widely used in industries such as Cement, Mining, Quarry, Aggregate, Steel and Coal. The screens are built for long service life and can be fitted with a variety of screen decks to meet the customer's specific application and also with plumbing for washing applications.

### BAZER range of Screening Equipment

### TRAIL BAZER range of Mobile Screening Plants

Robustly designed for trouble-free heavy duty operation at mines, quarries and for contract screening. A wide range of capacities are available up to 500 TPH employing circular motion inclined screens and elliptical motion horizontal screens. Screening plants are also available with plumbing and a screw washer for washing applications. The capacity range starts from 150 TPH and extend up to 500 TPH.

## PRODUCT RANGE

BAZER provides comprehensive material handling solutions to the cement industry, including Chain Bucket Elevators, Belt Bucket Elevators, Pan Conveyors, Air Slides and Apron Feeders. Adhering to CEMA standards and incorporating the very best components the equipment attains high reliability and predictable wear life. The components include BAZER proprietary chain exclusively manufactured for our company at the United States plant of a major chain manufacturer, and European sourced steel cord belt.

### BAZER range of Conveying Equipment

### TRAIL BAZER range of Crushing & Screening Plants

Are available in Primary, Secondary & Tertiary Modules either on skids or on wheeled chassis. A variety of options can be configured by pairing crushers with appropriate screens to produce products sized to the customers' requirements. The wheeled plants are designed for rapid deployment and versatility of production and incorporate quality components.
